

CANADIAN SOCIETY OF
OTOLARYNGOLOGY -
HEAD & NECK SURGERY

2nd Annual Simulation-Based Patient Safety Symposium

Saturday, June 11, 2016
12:30 – 16:30

Sir John A. MacDonald Ballroom
PEI Convention Centre
CHARLOTTETOWN, PE

Overview & Objectives

The CSO-HNS is pleased to announce a half-day, simulation-based workshop offered at this year's Annual Meeting. The interactive workshop provides a unique opportunity to refine technical and non-technical skills in an effort to improve patient safety in Otolaryngology. The workshop consists of 4 small -and large-group stations and follows the care of a single patient through various stages of his/her care.

Stations include: flexible / rigid bronchoscopy with foreign body removal, simulated patients for hands-on learning of practical crisis resource management (CRM) skills, and pertinent medico-legal scenarios. All simulations will include either individualized feedback or group debriefing sessions.

Agenda

- 12:30-13:00** Registration & Introduction
13:00-13:40 **Simulation Station 1**
 A patient presents for his/her pre-operative clinic visit. But an unanticipated critical situation occurs. Are you ready?
13:40-14:30 **Simulation Station 2**
 Surgery Gone Wrong! Intra-operative crisis during routine surgery.
14:30-14:50 Coffee break
14:50-15:30 **Simulation Station 3**
 Intra-operative removal of aspirated foreign body. Practice your rigid and flexible bronchoscopy skills.
15:30-16:10 **Simulation Station 4**
 I have some bad news! Post-operative disclosure of complication. Do you know what the medico-legal considerations are?
16:10-16:20 Survey
16:20-16:30 Closing Remarks.

Faculty
