Laryngologist – Head and Neck Surgeon
University of British Columbia and Vancouver Acute
Division Otolaryngology-Head and Neck Surgery

The University of British Columbia Division of Otolaryngology – Head and Neck Surgery together with BCCA and Vancouver Acute is seeking applications for the position of a Laryngologist to join in clinical and academic activities primarily based at Vancouver General Hospital in Vancouver, B.C. beginning July 2017.

Education and Requirements:

1) applicant must be certified by the Royal College of Physicians and Surgeons of Canada
2) have at least one year of clinical fellowship training in Laryngology.
3) a higher research degree or equivalent post residency research training.
4) clinical activities will be centered at the Voice Clinic at Vancouver General Hospital.

Description:

The successful applicant will be expected to contribute to undergraduate and postgraduate teaching, and develop and maintain a productive laryngology and voice disorders research portfolio. The applicant will join a multidisciplinary group including Speech Pathology and Psychiatry, and work in collaboration with Respirology and Neurology. The applicant will be appointed to the BC Cancer Agency and is expected to have active participation in the Head and Neck Oncology group.

The applicant’s fellowship training will have included all aspects of laryngeal surgery including trans oral laser surgery for glottic cancer, phonomicrosurgery, laryngeal framework surgery, complex laryngeal stenosis, dystonia, central sensitivity disorders and care of the professional voice. Documented research attainment in the field of laryngeal sciences is expected.

Application Process:

Please submit your application including cover letter, curriculum vitae and references **electronically prior to December 2, 2016** to the following address:
