

Bastian Voice Institute (BVI) is located in west suburban Chicagoland, approximately 20 miles straight west of downtown. The website is [www.bastianvoice.com](http://www.bastianvoice.com). BVI is a tertiary-care laryngology institute with a regional and national caseload. Currently, our clinical staff is comprised of 3 busy laryngologists and one physician assistant. All practices are full, and we are looking for a fourth physician interested in voice, swallowing, and airway disorders, as well as neurogenic cough, and inability to belch. We also manage cancers of the laryngopharynx.

We do an intensive fellowship for 6 months (seeing patients together all day every day) and then continue mentoring while helping the person to also build the beginning of his or her own practice. We are searching in particular for a resident who is equipped (usually by musical background or at least ability to match pitch) to learn from us the “vocal phenomenology” part of our “integrative” diagnostic model. If interested, please contact Dr. Robert W. Bastian at [robert.bastian@bastianvoice.com](mailto:robert.bastian@bastianvoice.com), or practice manager Kyle Bell ([kyle.bell@bastianvoice.com](mailto:kyle.bell@bastianvoice.com)), for further information or a personal conversation.
