

The Canadian Hearing Society in Toronto invites applications for an Otolaryngologist. Founded in 1940 to serve hard-of-hearing and Deaf individuals, CHS is the largest organization of its kind in North America offering a wide range of services including audiology, speech-language pathology, mental health counseling and more. As an otolaryngologist at CHS, you will be part of an integrated and highly trained team of professionals evaluating and assisting patients with hearing loss and other head and neck issues, spanning pediatric to geriatric populations.

Applicants should have successfully completed an accredited medical school and residency training program with specialization in otolaryngology. The candidate should possess good clinical skills, an interest in hearing loss and be certified or eligible for certification by the Royal College of Physicians and Surgeons of Canada and be eligible for an independent practice license from the College of Physicians and Surgeons of Ontario.

This is an excellent turn-key established opportunity for a new graduate, someone wanting to supplement their current practice, or individuals nearing retirement. CHS is conveniently located on a subway line with close proximity to academic hospitals. Medical equipment, office furnishings, patient data base and back-office support arrangements available. Onsite free parking for patients.

Current offering is part-time, one day per week, but can be expanded. For further detailed information, please contact Rex Banks, Au.D., Director of Hearing Healthcare and Quality at [rbanks@chs.ca](mailto:rbanks@chs.ca).
