Recruiting Full-time and Part-time Otolaryngologists

The Opportunity

Due to massive referral volumes, our clinic is seeking to add to our current team of 5 Otolaryngologists.

We are offering both full-time and part-time clinic opportunities within our busy practice, during weekdays, evenings and weekends.

You will be scheduled into fully booked clinics and we can adjust patient volumes according to your preferences. We offer very favourable overhead rates, which include EMR, clinic supplies and full administrative support.

This would be a great opportunity for recent graduates looking to bolster their clinical volumes or senior Otolaryngologists looking to add part-time clinic hours.

All candidates must be certified by the Royal College of Physicians and Surgeons of Canada, registered with the CPSO, and carry CMPA coverage.

About the Clinic

Toronto Head & Neck Clinic is a spacious and modern facility in the heart of Forest Hill (Toronto) located on the street level of the Forest Hill Family Health Centre medical building. The clinic is dedicated to ailments of the head and neck (Otolaryngology-Head & Neck Surgery).

The clinic boasts multiple full examination rooms, with operating microscopes, and a complete Audiology Clinic with same day audiogram and inner ear testing capabilities. We are also introducing full telemedicine capability to our current successful phone consult process to enable consultations from home.
