

68th Annual Meeting, May 11 - 13, 2014, OTTAWA, ON
Program-at-a-Glance

Version 11 – 04/29/2014

Sun May 11	Governor General I & II Ballroom	Governor General III Ballroom	Provinces I Ballroom	Provinces II Ballroom
08:00 – 10:00	OPENING SESSION: . Welcome, Dr. P. Gullane & Dr. F. Kozak . Guests of Honour, Dr. R. Ruby & Dr. E. Scott . Guest Speaker Presentation Dr. M. Birchall, London, UK – Is Airway Tissue Engineering Disruptive Technology? . CSOHNS Lifetime Achievement Award - Dr. P. Adamson, Toronto, ON	OVERALL LEARNING OBJECTIVES This meeting affords learners in the specialty of Otolaryngology - Head and Neck Surgery (including general and sub-specialty otolaryngologists as well as resident and medical student trainees) significant opportunity to attend sessions of interest and acquire further understanding in areas of perceived weakness in the specialty. All branches of the specialty including head & neck disease, laryngology, sinus disease, otology, neurotology, pediatric otolaryngology, facial plastic and reconstructive surgery and medical education, are part of the program. This year we have increased the number of overall workshops by having four concurrent sessions as opposed to three which will allow delegates numerous choices of learning opportunities. There will be continued opportunity for enhanced dialogue/discussion and interaction with the various presenters. In keeping with the theme of this year's meeting – "Prevention and Innovation: A Challenge for the Future", guest speakers will present their areas of expertise through plenary talks and workshops. The "How I Do It" section will continue as well as full and mini workshops to give each learner practical and adoptable knowledge to use immediately in practice when they return home. Review of feedback from the delegates of the 2013 CSOHNS annual meeting has resulted in continuing to provide the technological advancements of education with the "Technology: Otolaryngology 2.0 Session". Continuation of previous workshops that the membership wished to be updated on, e.g. "The Best Articles of the Last Year in Otolaryngology for the General Otolaryngologist" remains popular. As previous workshops are discontinued for a year or two, new workshops will give attendees new knowledge for improved care of their patients.
